

KONICA MINOLTA

PKI Cloud Suite for Federal Agencies

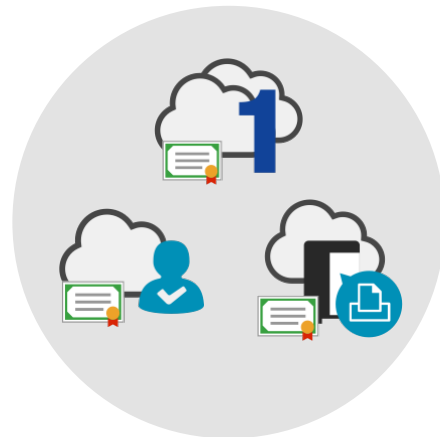

Microsoft 365 Government Integration | Entra ID CBA | Serverless Secure Workflows

MODERNIZE FEDERAL DOCUMENT SECURITY WITH KONICA MINOLTA MARKETPLACE PKI CLOUD SUITE APPS

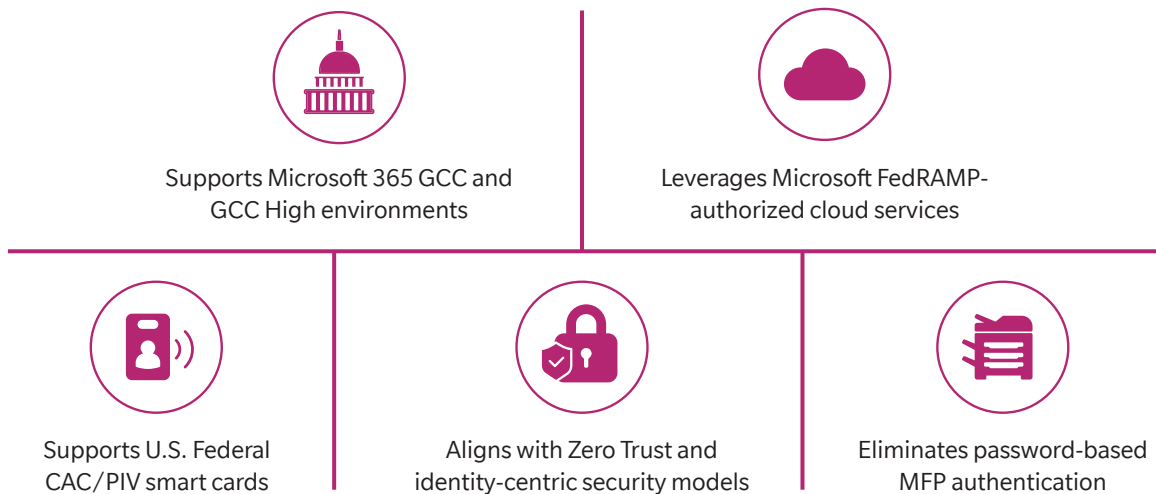

Konica Minolta MarketPlace® apps bring secure, cloud-based workflows directly to the MFP for Microsoft 365 GCC and GCC High environments. Users authenticate at the device using CAC/PIV smart cards via Microsoft Entra ID, enabling instant, password-free access to secure print and scan.

With no servers or middleware required, this native, serverless integration reduces complexity and cost while strengthening identity assurance. The result is a streamlined, Zero Trust-aligned approach to authentication, scanning, and print release.

As the industry's first embedded MFP integration for Microsoft 365 GCC and GCC High, the solution is purpose-built for U.S. federal agencies.

FEDERAL VALUE & COMPLIANCE ALIGNMENT

CAC/PIV AUTHENTICATION

Secure Printing for GCC & GCC High

- CAC/PIV authentication at the MFP via Microsoft Entra ID
- Password-free access reduces credential risk
- Secure print release only after identity verification
- Certificate-Based Authentication (CBA) ensures authorized access

Zero Trust at the Print Edge

- Identity-based access (not network-based)
- Every action tied to a verified user
- Full audit trail aligned to federal standards

Serverless & Simplified

- No print servers, middleware, or AD required
- Direct Entra ID integration
- Lower complexity, stronger security

PKI CLOUD SUITE

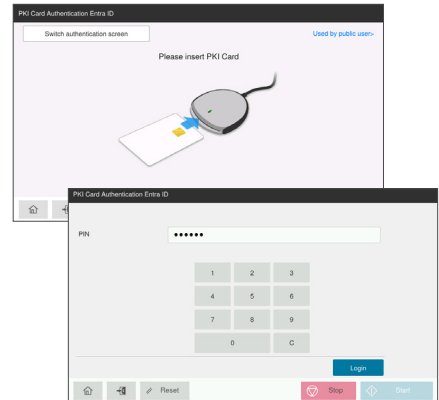

With CAC/PIV authentication and Entra ID validation embedded directly at the device, Konica Minolta transforms the MFP into a secure, cloud-connected endpoint. The PKI Cloud Suite brings this capability together through three integrated applications that deliver end-to-end identity-driven document workflows for federal agencies —without servers, middleware, or password-based authentication.

1. PKI Card Authentication - Entra ID

Konica Minolta enables direct CAC/PIV smart card integration with Microsoft Entra ID Certificate-Based Authentication (CBA), delivering true device-level identity enforcement.

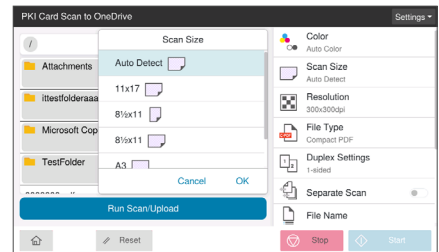

- Authenticate to Entra ID using CAC/PIV + PIN (MFA)
- No password entry required
- No on-premises Active Directory dependency
- Reduces Azure AD Domain Controller infrastructure costs

2. PKI Card Scan to OneDrive

Users can scan directly from the MFP to OneDrive for Government agencies using Entra ID authentication without server-based solutions or token registration.

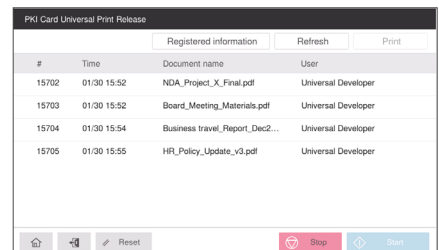

- Immediate OneDrive access after CAC/PIV authentication
- Single Sign-On derived from Entra ID token
- No middleware or server infrastructure required
- Secure cloud-first document workflows

3. PKI Cloud Universal Print Release

Konica Minolta delivers a serverless secure print release solution integrated with Microsoft Universal Print.

- Cloud-based Universal Print integration
- Secure print release at any connected KM device
- Prevents abandoned or mis-collected documents
- No on-premises print servers required

SYSTEM REQUIREMENTS

Required Accounts/Licenses

- MarketPlace account
- PKI Cloud Suite app device license

This solution is supported only on the latest Konica Minolta bizhub i-Series devices.

- bizhub C751i/C651i/C551i/C451i/C361i/C301i/C251i
- bizhub C750i/C650i/C550i/C450i/C360i/C300i/C250i
- bizhub 751i/651i/551i/451i/361i/301i
- bizhub 750i/650i/550i/450i/360i/300i
- bizhub 4751i/4750i/4051i/4050i (coming soon)
- bizhub C4751i/C4050i/C3350i (coming soon)

Supported Environments

Microsoft 365 GCC
(Government Community Cloud)

Microsoft 365 GCC High

For details on Microsoft 365 Government and related licensing, please refer to the Microsoft web page and Microsoft Learn documentation below.

- www.microsoft.com/en-us/microsoft-365/enterprise/government-plans-and-pricing
- www.learn.microsoft.com/en-us/universal-print/fundamentals/universal-print-government

For limitations related to the use of Universal Print, please refer to the Microsoft Learn documentation below.

- www.learn.microsoft.com/en-us/universal-print/fundamentals/universal-print-limits

Supported Card Readers/Cards

Supported CAC/PIV PKI Smart Cards

Additional Requirements

bizhub i-Series firmware version GP4-SA(00) or later

Marketplace Client Version 5.7.100 or later
